

A000000  
A000000 Conjectured formulas of the OEIS by Simon Plouffe as of July 1 2018.  
A000000 Version 1.0 : August 1992, Current version : 2018 07 01  
A000000 There are 50162 unique sequence and more than 104578 expressions.

$$\text{Score} := \frac{\ln(\text{nbr\_of\_terms}) \times \text{length\_of\_sequence}}{\text{length\_of\_formula}}$$

A000000 If the score is high the reliability of the formula is good.  
A000000 A score near 1 is not good, a score of 20+ is excellent.  
A000000 Some formulas are in double for many reasons, the sign or the factorization of the expression makes a change in length. The intention of the author is to keep the list as clean as possible, with time it will be done...  
A000000 These formulas are suggested, most of them are the true ones, in some cases the formula found automatically are better than the original reference.  
A000000 Some formulas are false positives, in some rare cases, even false the formula found is sometimes as interesting as the original.  
A000000 Some formulas appear with the value I (complex), it is not an error most of the time. On the other hand, to correctly evaluate the series it is necessary to :  
A000000 develop in series (ordinary or exponential).  
A000000 collect the terms,  
A000000 evaluate in floating point,  
A000000 evaluate in absolute value.
