A000000
A000000
A000000 If the score is high the reliability of the formula is good.
A000000
A000000 A score near 1 is not good, a score of 20+ is excellent.
A000000 Some formulas are in double for many reasons, the sign or the factorization
A000000 of the expression makes a change in length. The intention of the author
A000000 is to keep the list as clean as possible, with time it will be done...
A000000 These formulas are suggested, most of them are the true ones, in some
A000000 cases the formula found automatically are better than the original
A000000 reference.
A000000
A000000 Some formulas are false positives, in some rare cases, even false
A000000 the formula found is sometimes as interesting as the original.
A000000
A000000 Some formulas appear with the value I (complex),
A000000 it is not an error most of the time. On the other hand,
A000000 to correctly evaluate the series it is necessary to :
A000000 develop in series (ordinary or exponential).
A000000 collect the terms,
A000000 evaluate in floating point,
A000000 evaluate in absolute value.
